Professional Summary

Motivated Software Developer pursuing MCA with hands-on experience in web development, machine learning, NLP, and computer vision projects. Proficient in HTML, CSS, Bootstrap, JavaScript, Python, PHP, SQL, MongoDB, C, C++, and Java. Passionate about building practical software solutions and continuously learning modern technologies.

Technical Skills

Programming Languages: Python, Java, JavaScript, PHP, C, C++
Frontend: HTML5, CSS3, Bootstrap
Database: SQL, MongoDB
Tools & Technologies: Android Studio, OpenCV, NLP, Git (if applicable), GitHub (if applicable)

Internship

Google Map Place Picker Project (05/2023)
• Developed a Google Maps-based location picker for efficient place searching.
• Integrated Google Maps API for accurate location retrieval and interactive map functionality.

Projects

Sentiment Analysis Model & UI **(03/2026)**
• Trained and evaluated sentiment analysis models including BERT, RoBERTa, and DistilBERT.
• Developed an interactive Gradio interface to compare model performance.

Jackfruit Bulb Estimator **(10/2025)**
• Built a machine learning solution using OpenCV to estimate edible jackfruit bulbs.
• Applied image processing and mathematical formulas to support yield estimation.

Fish Shop Management System **(04/2024)**
• Developed a management system for inventory and order handling.
• Implemented search and filtering functionality for efficient stock management.

Education

Master of Computer Applications (2024–2026)
Bachelor of Computer Applications (2021–2024)
Class XII – 86.6%
Class X – 81%

Extracurricular Activities

• Class Representative (2021–2022)
• Coordinator for Inter-college Events
